

Year 1 Summer Term

Our Wonderful World

Welcome back after the Easter break. We hope that you have all had an enjoyable and restful holiday. We look forward to an exciting and busy term ahead, full of learning!

Maths

As mathematicians in Year 1 the children will be starting the term by consolidating and learning new skills. Linked with shape and measures, including length, capacity and mass. As the term progresses we will consolidate our multiplication learning and learning new skills linked with division. As we move towards the end of the term, we will be applying all of our learning in problem solving activities to ensure we have a good understanding.

Science

As Scientists, the children will be learning about the different classifications of animals, before moving onto plants.

Religious Education

This term in RE children will be learning stories from different religions and thinking about 'mystery' and puzzling questions!

PSHEe

This term in PSHEe children will be learning about their health and wellbeing. This includes teaching about physical health and mental wellbeing, growing and changing and keeping safe.

English

In English children will be applying all of the skills that they have already learned into their writing. As well as this, children will be taught and apply new skills such as prefixes, suffixes, adjectives, new punctuation and a range of conjunctions. We will be asking the children to apply their skills through a range of fiction and non-fiction writing beginning with a focus on non-fiction writing about animals and then writing a recount based around a chosen text that we will explore. As always, spelling will play an important part in our writing. Children will continue to have a mix of common exception words and words that are the focus within their phonics teaching for that week. Spelling tests will be on a weekly basis and new spellings will be given out by the Friday. Thank you for the support at home!

Topic

This term, for our thematic topic, we will be exploring 'Our Wonderful World'. In this topic the children will explore and identify the coastal areas of the United Kingdom, before travelling further afield. In Design and Technology, the children will create their own puppets, moving onto using patterns and different media with Art. Watch this space to find out who we meet on our travels!

P.E

This term the children will continue to be taught PE lessons on a Tuesday by Soccer 2000. Please ensure your child attends school on this day in their PE kit, and that all items are clearly labelled with their name.
